

HOW TO USE THIS TEMPLATE

Copy the prompt below, fill in your details inside the [] brackets, and paste it into Claude.

PROMPT TEMPLATE

```
You are a school academic plan document formatter. Generate a formal academic year
plan table in the EXACT format described below.

---

### DOCUMENT HEADER (centered at top):

[SCHOOL LOGO PLACEHOLDER – leave a blank square box on the left side,
approximately 60x60 pixels, with a thin border and the text "SCHOOL LOGO" inside]

**THE [SCHOOL NAME], [CITY/TOWN]**
**ACADEMIC PLAN [YEAR] – [YEAR]**

---

### DOCUMENT SUB-HEADER (left-aligned):

**Class:** [e.g., XII A & JEE]
**Subject:** [e.g., Computer Science]

**Name of the Teacher:** [Teacher Name] ← right-aligned on the same line
**Textbook:** [e.g., Tamil Nadu Govt. Textbook] ← right-aligned below teacher
name

---

### TABLE FORMAT:

Create a formal bordered table with these EXACT 7 columns with these EXACT column
headers:

| Month | Week | Period | Ch.no. | Name of the Topics / Sub Topics | Pa. No. |
Assignment |
```

Column width guidelines:

- Month – narrow, merged across multiple rows
- Week – narrow (Roman numerals: I, II, III...)
- Period – narrow (number of periods)
- Ch.no. – narrow (chapter number e.g., 5 & 6)
- Name of the Topics / Sub Topics – WIDEST column, takes up most space
- Pa. No. – narrow (page range e.g., 47-73)
- Assignment – medium width

Table formatting rules:

- Use proper thick outer border and thin inner cell borders
- Month cell should be VERTICALLY MERGED across all its rows and rotated/centered
- Week uses Roman numerals (I, II, III, IV, V...)
- Chapter topics should list the CHAPTER NAME in bold, followed by a dash-separated list of all sub-topics
- Multiple chapters in the same week go in the same Topics cell, separated clearly
- Page numbers show the range (e.g., 47 - 73)
- Assignment column gives a short task related to the chapter

DATA TO FORMAT:

Month: [e.g., January (WD-19)]

Fill in the following rows:

Row 1:

- Week: II
- Periods: 8
- Chapter No.: [e.g., 5 & 6]
- Topics: [Paste your chapter name and sub-topics here, comma or dash separated]
- Page No.: [e.g., 47 - 73]
- Assignment: [e.g., Explain the data types in Python.]

Row 2:

- Week: III
- Periods: 2
- Chapter No.: [e.g., 6]
- Topics: [Chapter name and sub-topics]
- Page No.: [e.g., 74 - 88]
- Assignment: [e.g., Write a detail note on for loop.]

Row 3:

- Week: IV
- Periods: 8
- Chapter No.: [e.g., 7]

- Topics: [Chapter name and sub-topics]
- Page No.: [e.g., 89 - 113]
- Assignment: [e.g., Explain the different types of function with an example.]

Row 4:

- Week: V
- Periods: 6
- Chapter No.: [e.g., 8]
- Topics: [Chapter name and sub-topics]
- Page No.: [e.g., 114 - 131]
- Assignment: [e.g., Explain about string operators in Python with suitable example.]

[Add more rows as needed in the same format above]

OUTPUT FORMAT:

- Output as a clean, print-ready HTML document
- Use black borders for all table lines
- Font: Times New Roman or similar serif font (formal academic style)
- All text inside table cells should be small (10-11pt equivalent)
- Chapter headings inside the Topics cell should be BOLD
- Sub-topics should follow after a colon or dash in regular weight
- The full document should look like an official school document
- Leave a clearly visible empty box placeholder for the school logo

Generate the complete formatted academic plan table now.

QUICK FILL EXAMPLE (Computer Science, January)

Replace the data section with:

Month: January (WD-19)

Row 1:

- Week: II | Periods: 8 | Ch.No.: 5 & 6
- Topics: Chapter 5 - Python - Variables and Operators: Introduction to Python, Key features of Python, Programming in Python, Interactive Mode Programming, Script Mode Programming, Input and Output Functions, The print() function, input() function, Comments in Python, Indentation, Tokens, Identifiers, Keywords, Operators, Delimiters, Literals, Python Data Types, Number Data type, Boolean Data type, String Data type. Chapter 6 - Control Structures: Introduction to control structures, Sequential Statement, Alternative or Branching Statement
- Page No.: 47 - 73
- Assignment: Explain the data types in Python.

Row 2:

- Week: III | Periods: 2 | Ch.No.: 6
- Topics: Chapter 6 - Control Structures: Iteration of Looping Constructs, Jump Statements in Python
- Page No.: 74 - 88
- Assignment: Write a detail note on for loop.

TIPS

- You can add as many rows/months as needed
- For multiple months, repeat the Month block and it will auto-merge cells
- Want it as a Word file? Add: *"Output as a .docx file I can download"*
- Want it as PDF? Add: *"Output as a print-ready PDF"*
